
Shadow4 License

Posted by he_the_great - 2009/02/08 23:46

I figure since Shadow4 comes with the free Rainlendar redistribution of it is not really an issue; but I ask because I do modify the skin and in doing so break it. I'm thinking it would be good to start using version control. I just want to make sure I can put it on Google code with a GPL license or something.

Yes, GPL is fine for the skin.
