Just some thanks

_____

I just wanted to thank you for your work on Rainlendar. I have been using it for about 2 years now and recommended it to many friends and members of my family. It is the best calendar application I found and its incredible that you wrote it for both Linux and Windows, as I use both systems and would hate not to have rainlendar on one of the systems.
So once again, thank you. (And of course I bought a pro license yesterday (using a different e-mail adress) even though I don't need the Pro stuff. The software is really worth the money)
