
Bulletpoint overlaps texts

Posted by Nick Fan - 2006/11/23 22:09

I am using Version 2.0 (b25) Rainlendar and I find a bug using To-Do. The bulletpoint (tiny white dot) overlaps the first letter of to-do list when the to-do is categorized "Important" & "Issue." For instance, if your to-do is "Duplicate keys," you will see the dot shown within the capital D. Sorry that I cannot attach a screenshot to make it clearer.
