
1968?

Posted by Widi - 2006/10/28 18:01

Hi!

I found another strange thing: If I create a birthday where the year of birth is 1968, it's changed to 1688. Not in the properties of the event, but in the "Start" column in the manager-window.

Greetings

True. I'll see what causes the problem.
