
Dominant Negative skin tray icon invisible....

Posted by bbusbee - 2009/02/28 04:51

When I hover with my mouse over where the tray icon should be the Event for the day will appear, but the tray icon itself is invisible. How do I fix this?

Does this happen only with that one skin? Try using some other tray icon. You can change the tray icon from the advanced skin options.

Thanks Rainy,
I just went back to the Shadow4 skins.
Thanks
