## create r2skin file

Posted by JMPCOMPUTER - 2006/11/25 16:11

---

Hello, I would wish to create a file with the format r2skin. How do I have to proceed? Thank you.

See my post on Skinning Rainlendar 2. It has been buried deep with in the support forum. Fixed link (didn't like the "s)

Hello,

This Link "Skinning Rainlendar 2" is "Error 404, not Found"....unsure:

Hello, I am sorry, but in spite of my goodwill and the translator integrated into the forum, I do not include/understand anything with these instructions. If somebody could indicate to me as good French the method to create a skin with the format "r2skin", I would be eternally grateful to him. Thank you!
