## Event overview like in notes or outlook

Posted by Mark159 - 2009/03/05 07:58

---

hi,

is there any skin which shows a overview of a week with the events like the pic?  
it would be helpful to see all the events of the week and the free time.

i couldnt find a skin and i'm not very save in programming ...

thanks for answers.

cheers,  
mark

Rainlendar doesn't have support for that kind of view.

But it sure would be nice :)

Personally I don't care about that view but recently I tried to convert my gf to Rainlendar and she liked it but wanted such a view... :(

I support this request!  
(May be also move this to the requests-section)

Ideal would be a day-view and a weekly view. May be at least for the next major version? If you have a lot of events this would make it a lot easier to get an overview of what is actually going on.

Thanks!
