
Using Serbian translation

Posted by ozzii - 2009/03/06 03:43

Hello,
I updated the Serbian translation but now I can't see it.
I have it into the drop down list but when I select it, all the sentences are in English :angry:

Any help ?

Thanks.
Did I have to redownload the language file ?
Did this change will working on the next update?

Thanks.

It should be working with the current version so just download the language file again.
