
Winamp Codes

Posted by mobius1 - 2009/03/11 22:42

Is there any way to change the way Rainmeter displays the track title? Such as getting rid of the track number or splitting up the title of the song and the artist.

PS. Can you create rounded edges in Rainmeter or do you have to use an image created with another program like Photoshop?

It will become possible if Substitute comes to be supported by Regex. However, on the current function, it is difficult work.

You change a setup of WINAMP rather than it.

Options > Preferences > General Preferences :
Show the playlist number...] check off !!
(this option is a higher version only)
