
wrong working of hotkeys

Posted by pechorin - 2006/11/26 14:27

hi! great update, but i've got a problem. i have defined the hotkey for show all windows and when i use it, all the screen tremble and it delays about 3-4 seconds in appear.

with the last version it was instantaneous and clean, so it must be a bug.

Are you using ClearType? If you do, try disabling it to see if that helps.

yeah, it worked... but cleartype is cool!!

thanks.
