## Hiding dates

Posted by bishop41466 - 2006/10/29 21:42

---

Hi, I'm wondering how to hide the dates from previous and next months that show in current month. I have tried some data format codes, but didn't work. Please help me.

Go under OPTIONS...

1) Under Shadow 4 Skin, go to the right window and find the calendar option (usually just called CALENDAR or CALENDAR.1, CALENDAR.2, etc if you're using multiple months).

2) Having found calendar, click on SETTINGS.

3) Change the value for "Show Adjacent Days" to 0.

4) Close option screen and... Enjoy!

Thanks for your help.:)

But I can't find the "Show Adjacent Days" under skin->Calendar.

There are only:

Visible True

Scale 100

show buttons 1

show week numbers 1

visible month 0

I've tried add showadjacentdays in the .ini file. But I don't know which section should I put it into, so it doesn't work.

Thanks again.

Are you using the latest version? The "Show Adjacent Days" should be the last item in the list.

Oh~ It works after I uninstall and install it. I can find the option now. But I still don't know why I couldn't find that before. Weird.

Thank you very much! I love it so much:P
