## Code

Posted by mobius1 - 2009/03/25 01:55

---

I want to know more about the code used for Rainmeter so I can create more elaborate skins, but I can't seem to find any good tutorials/lists. I know I could download skins and learn the code through them, but if it exists I'd rather see a list of some sort. Sorry in advance if I'm being an idiot and what I'm looking for is right here on this site. Thanks.

Most of what you need is in the help file. Well, that and downloading skins and trying stuff ;)
