
Someia FannonMOD Skin - first release

Posted by Fannon - 2009/03/25 10:11

Hi,

you'll find some description in this thread:

http://www.rainlendar.net/cms/index.php?option=com_kunena&Itemid=36&func=view&catid=9&id=9167#9167

http://www.rainlendar.net/cms/images/fbfiles/images/Someia_FannonMod1.png

<http://www.filedropper.com/second/feab3cc022e5882264a3f3216a1fa377.jpg>

You can download the skin here.

I hope now it works!

Please report bugs, feedback and weird behavior!

greetings.. and have fun!

Simon

Simon the skin is crashing Rainlendar!!!

I renamed it to .zip and tested and found out that there is an error:

Unexpected end of archive

I think the file is corrupt, please verify

Sorry, my Internet does very often do weird things with my uploads. I think now the skin should be uploaded correctly (filesize changed)

Please report if the skin works... :)

Thanks,

Simon

Hummm file is still with the same error (unexpected end of file)

Check your firewall settings (router included)

If your using a FTP program use FileZilla

Last but not least change your DNS to.opendns.com

208.67.222.222

208.67.220.220

File no longer gives Unexpected end of file.

I was able to install it, but the icons are not showing (see pic below)

<http://img220.imageshack.us/img220/6618/calendar01q.jpg>

I don't know why this is happening but I'll try to help identifying the problem...

Anything developing on a fixed version? I really like this skin!

elements.xml points to the small icons, but the icon folder doesn't contain them.

You can either replace Fannon's icon folder with that of the originals (which does contain the small icons), or edit the categories so that they point to the larger sized icons.

Where is the code to change the background color/shade? I would like to make the background transparent but I am not much of a coder.
