
Cat skin v121_cat.zip

Posted by n Fleming - 2009/03/27 17:04

I unzipped the file into my skins directory but it does not show up in the program.
Please help. :S

Do you have activate this skin in Options-Skins?

You have to unzip the file to a subfolder to the skins directory. And then refresh Rainlendar.

Thanks for the responses. Problem solved. Changed file extension to "r2skin" and it installed fine.

Best,
Neil
