
make rainmeter draggable

Posted by bugreporter - 2009/04/06 10:02

ok i have made a config that involves a "leftdownmouseaction" but the thing is, how do i set the drag margins for the config.

i am so far unable to drag it.

Do you mean being able to drag anywhere on the screen? In that case, you can make a simple transparent meter that allows you to move it around. It might look something like this:

```
Meter=IMAGE
X=0
Y=0
W=145
H=20
SolidColor=0,0,0,1
```

The color doesn't event matter so long as the 4th number is 1. that sets the transparency.

If you mean something else, not sure.
