## Rainlendar 2.5 build 75

Posted by Rainy - 2009/04/12 04:48

---

Build 75 can be downloaded from here:

Windows: Rainlendar-2.5.b75.zip

Linux TAR (32-bit): Rainlendar-2.5.b75-i386.tar.bz2

Linux DEB (32-bit): rainlendar2-pro\_2.5.b75-1\_i386.deb

Linux TAR (64-bit): Rainlendar-2.5.b75-amd64.tar.bz2

Linux DEB (64-bit): rainlendar2-pro\_2.5.b75-1\_amd64.deb

Mac OS X (Intel): Rainlendar-2.5.b75.dmg

This is beta version! It has not been tested.

The addons for Shadow4 skin 1.4:

<http://www.rainlendar.net/download/1.4/Shadow4-Widgets.r2skin-addon>

<http://www.rainlendar.net/download/1.4/Shadow4-Languages.r2skin-addon>

Changes:

- o Alarm was calculated incorrectly for the weekly recurring all day events. Fixed.
- o Alarm for some recurring Outlook events couldn't be dismissed. Fixed.
- o "ignoredefault" doesn't ignore the default appearance anymore if it comes from other events.
- o The alarm list is sorted by the start/due time.
- o Setting remainder to 0 for text element disables the bitmap rotating.
- o Priority items for todo lists can contain child items now too.
- o Added color categories to the Shadow4 skin.
- o Added search field to the advanced options. Both the property names and values are matched.
- o The X-properties are removed from the exported ics file to make it more compatible with other calendar applications.
- o Added context menus to event/task editors and the manager on Mac.
- o Skin details window now displays the installed addons.
- o Tasks written to RTM didn't preserve the due date. Fixed.
- o Outlook alarms didn't work on some timezones. Fixed.
- o Added API functions to edit the events/tasks from lua scripts.
- o Clicking the button in front of the tasks toggles the status between completed and needs action.

I'm still having issues with the RTM plugin.

Once or twice a day it will inform me that I need to authorize Rainlendar for RTM, but when I go to the website it tells me that I've already done the authorization. I then get intermittent RTM errors, but no tasks display at all.

Yes it's working. Now - after some more testing - for something else that isn't working, yet. :blush:

The place, status, alarm and the description isn't preserved.

And in RtM, it's possible to add an est. time, and an URL - Hint Hint :side:

Strange, but when rebooting my WinXP-box, the task has changed! From a 3-hour task, repeted every monday 5 times, to a 5-week task (13/4 - 18/5, pink dates)! :huh:

o Outlook alarms didn't work on some timezones. Fixed.

I can verify that this bug has been fixed on my box. Thanks for the awesome support! \*trundles off to purchase Rainlendar Pro\*

epiphany, are you able to reproduce the problem still? Can you attach the Rainlendar's debug log from the situation where the authorization has just been lost?

Arne Anka, Rainlendar seems to read the weekday incorrectly from a weekly recurring RTM task. I'll fix that. I'll see also what I can do about the missing fields.

---

## Re:Rainlendar 2.5 build 75

Rainy, as of yet I'm unable to consistently produce the problem, it seems to occur at random intervals, but I am running in debug mode now so hopefully it will pop up and I'll be able to snag logfile for it.

Yesterday for no apparent reason Rainlendar finally did display my tasks from RTM! I was so excited. It also, however, displayed all of my completed tasks for up to a month ago. I left it on overnight, and came back this morning and the tasks were no longer displaying.

I added a test task (cleverly named "Test") and now it is the only task visible, although it does appear online on my RTM and it does have the correct due date.

Alarm for some recurring Outlook events couldn't be dismissed. Fixed.

I'm still having problems with that.:(

The exact same thing happened to me. The only difference is all my RTM tasks are showing, not just the ones from this month. They also haven't disappeared yet (even after an overnight), and adding a task from Rainlendar works fine & shows up on RTM's site.

Rainlendar reads all your tasks from the given RTM list. It's not possible to define any time period for the tasks which are read.
