## Notes?

Posted by Mzero - 2006/11/28 04:18

---

I just installed the new rainlender 2 version and I noticed the notes are gone. I relied on that pretty heavily in the past and I think its a great feature. I always put a lot of information that I need for work in there since it is easy to look up when I need it. Am I missing it somewhere in the menu or has it been removed?

The notes have been removed for now. There are some plans to add support for them in later versions.
