
Upload failed

Posted by Antonski - 2009/04/16 05:20

Hello,

Two days ago I've updated (partially) the bulgarian language fail, after upload it showed 96%.

Later one I found some spare time and translated all (and corrected some) messages.

However, since then I am unable to upload the new file, always get an error "Upload failed: No file. rainlendar2.po" .

I've checked it many times and I cannot understand what's wrong.

Would you please check it (in attachment)?

Thanks in advance.

Tony

Hi,

I've tried line by line and found which lines cause the problem if they are translated, see attached screenshot.

I've translated and corrected the rest.

Cheers. <http://www.rainlendar.net/cms/images/fbfiles/files/Clipboard01.zip>

The problem actually was caused by a size limitation for the uploaded files so your translation is fine. I increased the limit and uploaded the language file again.
