
Language skin addon for Shadow4 outdated

Posted by Antonski - 2009/04/16 05:53

Hello,

I tried to install the addon downloaded from <http://www.rainlendar.net/download/Shadow4-Languages.r2skin-addon> but the installation failed because the new skin has a version 1.4 while the addon is for v1.3.

~~

The download links to the updated addons are in the same post where the beta version can be downloaded.
