
How often does rainlendar sync with outlook/gcal?

Posted by Mikus7 - 2009/04/18 22:15

I'm thinking of buying a pro license for rainlendar to utilize the sync features, I'm wondering how often it syncs. If I enter a new event on my google calendar, how long will it take to show up on my rainlendar, and vice versa?

Thanks

-Mike

Outlook is kept up to date in real time. For Google Calendar you can define the polling frequency from the calendar's settings.
