
Online Calendar Backup

Posted by heimwege - 2006/11/28 09:51

I was wondering what went wrong as I checked the "backup"-option of my online calendar. There is no .rainlendar2/backups folder and so there's no backup at all. Does this only work with the registered version or what went wrong?

The Logfile seems to be OK (I starred out the URL):

```
14:36:20: GoogleCalendar: Downloading: ***
14:36:25: GoogleCalendar: Result: (0) 200 OK.
14:36:25: GoogleCalendar: Read 368 VEVENTs and 0 VTODOs from file "****"
14:36:25: CItemImage::Draw(): Unable to find the element ""
14:36:25: CItemImage::Draw(): Unable to find the element ""
14:36:25: CItemImage::Draw(): Unable to find the element ""
14:36:25: CItemImage::Draw(): Unable to find the element ""
```

The backup is only created if you change something in the downloaded calendar.
