## Rainlendar 2.5 build 76

Posted by Rainy - 2009/04/26 04:54

---

Build 76 can be downloaded from here:

Windows: Rainlendar-2.5.b76.zip

Linux TAR (32-bit): Rainlendar-2.5.b76-i386.tar.bz2

Linux DEB (32-bit): rainlendar2-pro\_2.5.b76-1\_i386.deb

Linux TAR (64-bit): Rainlendar-2.5.b76-amd64.tar.bz2

Linux DEB (64-bit): rainlendar2-pro\_2.5.b76-1\_amd64.deb

Mac OS X (Intel): Rainlendar-2.5.b76.dmg

This is beta version! It has not been tested.

The addons for Shadow4 skin 1.4:

<http://www.rainlendar.net/download/1.4/Shadow4-Widgets.r2skin-addon>

<http://www.rainlendar.net/download/1.4/Shadow4-Languages.r2skin-addon>

Changes:

- o Year long events were not shown correctly on the calendar. Fixed.
- o Added support for description, location, status and alarm properties for the RTM tasks.
- o Fixed a memory leak in the event list.
- o Tray icon now shows the status when Rainlendar is synchronizing the network calendars or when it is in offline mode.
- o Alarms didn't work for Outlook tasks. Fixed.
- o Calendar shows only the future recurring tasks if the "Hide completed tasks" is enabled.
- o Setting a repeated task completed marks it so until the current date (instead just to the alarm time like previously).

Rainlendar seems to have had some therapy to help come to terms with various RTM problems. Now it's OK.

wandererm, I can't reproduce the problem. Can you attach the Rainlendar's debug log?

---

also a RTM problem:

I don't know if I am making some kind of mistake but Rainlendar shows the priority of my tasks backwards as in RTM, high priority is displayed as low and vice versa.

=====

Thanks, I got it!

I installed the add on from Desktop, but my desktop folder has been renamed to Chinese "Lb".

So Rainlendar couldn't accept the file path.

---

Yes, the priorities seem to be reversed. I'll fix that.

Rainy: it seems the Private checkbox is not working properly. The Private checkbox is checked but when I go into Outlook and view it, the Private option is not enabled.

Will you please look into this.

Thanks.

True. It seems that setting the private property for the appointment isn't enough for Outlook. I'll check if there is some other property which needs to be set too.
