
current date formatting in rl window

Posted by alta88 - 2006/11/29 00:40

i'd like to have the digiclock window look like this:

11:35:44 PM
Wednesday
29-Nov-2006

possible? i couldn't find a 'date' element..

Well, you cannot do it with the digiclock in Shadow4 since the bitmap font contains only numbers (and the 'am' & 'pm' texts). But if you change it to use a normal font you should be able to make it this way. The time element can use the same format codes as the DateFormat.

aha! perfect, i'd use a font anyway.

thanks.
